EXECUTIVE SUMMARY

AI/ML Engineer specializing in LLM-powered applications, RAG systems, and scalable APIs. Experienced in Python, LangChain, FastAPI, and React — with proven ability to build and deploy real-world AI products from scratch.

EDUCATION

B.Tech Computer Science With Artificial intelligence and Machine Learning 2020 – 2024
SRM Institute of Science and Technology - CGPA - 8.68 Chennai, India

TECHNICAL SKILLS

Programming Languages:

Python, Typescript, C , C++

AI and Machine Learning:

RAG, Agentic AI, Fine tuning, Prompt Engineering

Backend & API Development:

FastAPI, REST APIs, JWT, MongoDB, Redis, PostgreSQL

Dev Tools:

Git, GitHub, VS Code, Postman

LLM & AI Frameworks:

LangChain, LangGraph, OpenAI API, Gemini LLM

Data Processing & Embeddings:

FAISS, Vector Databases, Embedding Models

Frontend & UI:

Next JS, Tailwind CSS, Zustand, Tanstack Query, ShadcnUI

Cloud & DevOps:

AWS, Docker, CI/CD Pipelines, GitHub Actions, Nginx

PROFESSIONAL EXPERIENCE

Technical Analyst - Revature

2025/04 – Present
Chennai

- Hands-on experience with Python and SQL through structured training and project development, applying concepts directly in a full-stack context.
- Built and contributed to projects spanning backend APIs, database design, and front-end integration — aligned with modern full-stack development practices.
- Mentored students in building full-stack applications, including FastAPI-based authorization systems and MongoDB-integrated backends. Provided technical support and troubleshooting during live coding sessions, helping learners debug and deliver real-world projects on time.

PROJECTS

AI-Powered Symptom Analysis (Python • LangChain • FastAPI • NLP)

Developed an AI-driven chatbot to assist trauma patients by analyzing their symptoms, providing support, and connecting them to nearby doctors in critical cases. Integrated NLP for user interaction and real-time assessment.

ML-Based Loan Approval Prediction Engine (Python • scikit-learn • pandas)

Built a machine learning model to predict loan approvals based on applicant details such as credit history, income, and loan amount. Implemented data preprocessing, feature engineering, and model optimization for accurate predictions.

E-Commerce Platform with DevOps Integration (Next JS • FastAPI • MongoDB • Docker • GitHub Actions) 🔗

Developed a production-ready e-commerce application using React for the frontend and FastAPI with MongoDB for the backend. Implemented role-based admin controls, and secure RESTful APIs. Containerized the application using Docker and Docker Compose, with CI/CD automation via GitHub Actions for testing and deployment.

Employee Performance & Development Platform (React • FastAPI • PostgreSQL)

Built and deployed a full-stack HR management platform using React, Fastapi and PostgreSQL enabling managers and HR teams to track employee performance, manage development plans, and identify skill gaps — featuring role-based access control, CRUD operations, and responsive UI.

CERTIFICATES

- Python for Data Science - Nptel 🔗
- Developer Virtual Experience Program - Accenture
